# **Path**_Minder_ products at a glance

Optical turnstiles

Secure your high profile lobby in an elegant fashion, without causing lineups.

Available with and without retractable barriers.

Doorway tailgate sensors

Secure your unstaffed doors, and make sure that only people with valid ID enter your site.

Create a mantrap by placing a tailgate sensor between two doors.
Add biometric verification inside for highest security.

People counters

Twelve detection beams.
Make traffic statistics count.

Control software

Monitor and record.
Program and optimize.

Deployment platforms

Set up. Tear down.
Repeat.

System integration

Use biometrics.
Works with fingerprint scanners, hand geometry readers, iris scanners, and just about any other biometric device imaginable.

Use a PIN pad.
Accepts a keypad for entering a numeric code. Also accepts a combination key pad/card reader.

Use any card reader.
Compatible with all proximity, magnetic and smart card readers, including remote (long range) card readers.

Use any access control system.
Integrates easily into all kinds of access control systems.
